Check Engine Light . The engine control module (ECM) continuously monitors the environment in the engine. Using the manifold absolute pressure (MAP) sensor or mass air flow (MAF) sensor, among others, the ECM modulates fuel injector pulse, spark timing, and valve timing. If there is a vacuum leak, the ECM may be unable to compensate.

[Engine Vacuum Leak: Symptoms and Solutions.](#)

The engine is working in four steps: that's why this engine type is called a four-stroke engine. The piston goes down, filling the cylinder with an air-fuel mixture from the intake The piston goes up, compressing the air-fuel mixture to a high pressure
