Agriculture is the practice of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers began to ...

This program encouraged the formation of peasant associations, large villages based on agriculture. The legislation did lead to an increase in food production, although there is debate over the cause; it may be related to weather conditions more than the reform. Urban populations have continued to grow with an 8.1% increase from 1975 to 2000.
